

Paradox MG/SP 32 Zone Family – At a Glance

-  Smart Phone or Smart Device (iOS or Android) connectivity to your premises
-  Systems available from 5 to 32 Alarm Zones
-  Hardwired, wireless and hybrid systems to meet all installation requirements
-  The smartest user interfaces on the market with the classiest touch screen control centre
-  Configured by Paradox to meet the strict demands of the New Zealand Security Industry

-  Wireless remote keypads
-  The largest range of wireless detection devices and accessories on the market
-  Wireless repeaters to ensure that large premises can be covered with ease
-  Market leading 2-way remote controls with full system feedback in your hand
-  Back to Base monitoring using 3G network, Internet or Telephone Dialler (may require additional modules)

Back to base monitoring

The best way to secure your family and your possessions, whether you are at home or away, is to have your system report back to a security monitoring centre. Statistics show that 26% of all burglaries happen while we are at home, in these situations we must rely on our security system to report offsite to a monitoring centre to ensure the safety of our families.

Intrusion Alarms, Panic Alarms, Medical Alarms and system conditions can all be reported back to base via the Internet, GSM network, GPRS network or via the traditional telephone line. As the fibre optic network installation picks up speed across New Zealand, Paradox has many ways to communicate with monitoring centres. Ask your installer for the options in your area.

About Paradox

Paradox have been manufacturing and supplying leading-edge security systems to the world for over 25 years. It's the feedback from all our customers that has helped us design the worlds most flexible yet user-friendly range of security systems available today.

In New Zealand we have developed Paradox NZ defaults for our security systems so that we can meet the demands of the local market and ensure that our systems meet the New Zealand regulatory requirements and all the needs of the customer.

Sophisticated...yet simple.
